This Intergovernmental Telecommunications Facilities Sharing Agreement ("Sharing Agreement") is made and entered into as of the first day of July, 1995 by and between the City of Phoenix, a municipal corporation, (hereinafter called "PHOENIX"), and the City of Goodyear, a municipal corporation, (hereinafter called "GOODYEAR").

RECITALS:

WHEREAS, GOODYEAR and PHOENIX have the power to execute intergovernmental agreements pursuant to A.R.S. Section 11-952; and

WHEREAS, PHOENIX has the power to enter into intergovernmental agreements pursuant to Chapter 2, Section 2, and Chapter 4, Section 2, subsection 64 of the Phoenix City Charter; and

WHEREAS, GOODYEAR AND PHOENIX desire to share telecommunications facilities and/or services owned by each Party under the conditions set forth in this Sharing Agreement; and

WHEREAS, potential electronic sites are limited, and in order to avoid a proliferation of site developments by a number of users, it is in the public interest for both Parties to share those facilities that serve the common good.

NOW THEREFORE, it is hereby agreed, by and between the parties as follows:

AGREEMENT:

1. FACILITIES RECIPROCAL USE

Subject to Paragraph 2, GOODYEAR and PHOENIX each agree to allow the other party to use its telecommunications facilities, wherever located, upon request of the other party except where the requested usage would cause substantial interference with the telecommunications operations or service of the party owning the facility, or where prohibited by agreements.

2. SITE-SPECIFIC SUPPLEMENTALS

Whenever either party desires to share telecommunications facilities owned by the other party, such party shall give the other written notification specifying the site and the character of the equipment which the requesting party desires to install at the site. If the other party accepts the request, the parties shall then enter into a site-specific supplemental agreement which shall set forth all relevant terms and conditions with respect to the site Supplemental Agreement. Each of these site-specific Supplemental Agreements shall make reference to this Sharing Agreement and become supplements to this Sharing Agreement. The parties will cooperate with each other in obtaining any necessary consents or rights-of-way should the underlying ownership to the site be a person other than one of the parties to this Sharing Agreement.

3. CONSULTING FEES

Any consulting fees incurred shall be paid by the party employing the consultant.

4. FREQUENCY PROTECTION

The responsibility for resolving interference problems shall be specified in the site-specific Supplemental Agreement.

5. USE APPROVAL PROCEDURE

Reciprocal use by either party of the other party's telecommunications facilities shall be subject to the following conditions:

- a. Prior to installation, the party requesting the use of the facility shall submit a site installation plan and equipment specifications to the owner's telecommunications section, and obtain written approval from that section prior to installation. If the site is owned by a third party, the party requesting the use of the facility shall also submit a site installation plan and equipment specifications to the site owner and obtain their written approval.
- b. The party requesting use of the facility shall bear the cost of purchasing, installing and maintaining the equipment necessary to complete the installations.
- c. The owner of the facility shall take reasonable precautions to protect the other party's equipment located at the facility, but shall not be responsible for damage to, or loss of, such equipment whether by fire, theft or otherwise unless caused by negligence of the owner of the facility.

6. RECIPROCAL USE, RIGHTS AND OBLIGATIONS

- a. Each party shall have its transmitter frequencies examined by the telecommunications manager for the facility where the installation is to take place to detect any potential cause of interference at the telecommunications site. Transmitters shall employ isolators, circulators, resonant cavities and other devices to reduce interference as the state-of-the-art and good engineering practices dictate.
